

Simple and comprehensive research

The StiftungSchweiz search combines powerful search and list functions for efficient foundation research. With filters and algorithm, you quickly find suitable organizations, save results in lists, share or export them. Saved searches automatically notify you of new results. In the table module, lists can be structured and used for project management.

- Search in a comprehensive foundation directory with over **15,000 organisations**
- Use **intelligent lists** with smart suggestions and activity history
- Get precise results thanks to over **10 helpful filters**
- **Save entire searches** and be notified of new results by **email**
- Save, manage and export organisations in **lists**
- Structure research in the **table module** and use it for project management

The functions at a glance
